**Important events to be reported:** Execution of a significant framework agreement

The management of 2B Intelligent Soft S.A. (hereinafter referred to as the "Company") informs shareholders of the execution of a significant framework agreement, whose estimated value exceeds 10% of the total revenue reported in the latest annual financial statements.

The agreement details are set out below.

**Provider**: 2B Intelligent Soft S.A.

**Client**: confidential; an entity unaffiliated with the Company, part of an international group active in the oil sector.

**Type of agreement**: framework services agreement.

**Date of execution**: 11.08.2026

**Term**: three years from the date of execution by both parties, with the Client having the option to extend it for an additional two-year period.

**Estimated value of the agreement**: The agreement provides for an estimated annual value of EUR 1,038,320.334, excluding VAT, resulting in an estimated value of EUR 3,114,961.002 for the initial three-year contractual term. The Client has the option to extend the agreement by two years, in which case the estimated value for the maximum five-year term may reach EUR 5,191,601.67, excluding VAT.

**Subject matter of the agreement**: the provision of IT services for the operation and support of IT systems used within the network of fuel stations in Romania, including on-site support services and Level 1 and Level 2 technical assistance services.

Given the legal nature of the framework agreement, it establishes the contractual framework and the general terms and conditions applicable to the provision of the services. In performance thereof, the Client will issue call-off orders/purchase orders setting out, in particular, the number of stations included in the recurring support services and the relevant service period, as well as, where applicable, separate orders for additional services.

The estimated value disclosed in this report represents an estimate made as of the date of execution of the framework agreement, based on the estimated volume of services to be provided during the contractual term, and does not constitute a guaranteed minimum value. The actual value of the agreement will depend on the volume of services requested by the Client during the performance of the framework agreement and on its actual duration, as the framework agreement may terminate before the expiry of its term, under the conditions stipulated therein.

The Company will inform the market, through current reports, should significant changes occur to the estimates disclosed in this report or to the performance of the framework agreement, to the extent that such changes constitute information whose disclosure is required under the applicable regulations.

Radu Scarlat
