Important events to be reported: Implementation of a financial-accounting system that accepts payment with stablecoins

The management of Softbinator Technologies S.A. (hereinafter referred to as the "Company") informs the shareholders about the implementation within the Company of a financial-accounting system that accepts payment with stablecoins, thus becoming one of the first blockchain providers in Romania to accept payment with such cryptocurrencies.

A stablecoin is a cryptocurrency dependent on a real-world monetary reserve, for example the US dollar, but not tied to a central bank. Due to belonging to a monetary reserve, the value of such cryptocurrency does not fluctuate, hence the name "stablecoin", and will remain tied to the currency for which it was created.

The Company decided to implement a financial-accounting system that accepts payment with stablecoins in order to facilitate the collaborations it has with customers in the blockchain area, so that their assets no longer go through a complex bureaucratic route before being registered in the Company's systems. With the implementation of this system, the Company is even more prepared to seize the opportunities in the world of blockchain, both at the level of cryptocurrencies and blockchain as a technology for humanity.

Starting with 2022, the Company has a business development department dedicated to the blockchain field, through which it aims to attract revenues from blockchain solutions representing at least 10% of the total turnover.
