EVERGENT Investments continues to extract value from its portfolio received in the privatization process

EVERGENT Investments informs investors that it has completed the full sale of its holding in Șantierul Naval Constanța, a company with low liquidity.

The sale of SNC shares aims to achieve the objective of capitalizing on the holdings from the historical and non-performing portfolio, in accordance with the investment strategy. The amount obtained from the sale of SNC is 2,601,672 lei and contributes to the company's investment needs.

EVERGENT Investments continues its efforts to capitalize on holdings received in the past, with a very low growth potential.
