GENERAL INFORMATION

Electromagnetica S.A. is a joint-stocks company established in 1930 with Romanian legal personality and unlimited lifespan that is organized and operates according to the articles of association and based on Law no. 31/1990 on companies, republished, in compliance with Law no. 24/2017 on issuers of financial instruments and market operations and ASF Regulation no. 5/2018 on issuers of financial instruments and market operations.

On 30.06.2026, the company's share capital is RON 67,603,870.40 divided into 676,038,704 common shares, registered and dematerialized, registered in an electronic account in the shareholders' register kept by Depozitarul Central S.A.

The main object of activity of Electromagnetica S.A. is NACE 6820 - Rental and subletting of own or leased real estate, according to the Classification of Activities in the National Economy, approved by the Order of the President of the National Institute of Statistics no. 377/17.04.2024 (CAEN Rev.3).

Electromagnetica S.A., as a company whose shares are admitted on a regulated market (Bucharest Stock Exchange, Premium category, symbol ELMA), has adopted IFRS starting with the financial year 2012. The financial statements for 2025 were prepared in accordance with the provisions of OMFP no. 2844/2016 for the approval of the Accounting Regulations in accordance with the International Financial Reporting Standards adopted by the European Union.

In the first half of 2026, Electromagnetica S.A. ("the Company") had the role of parent company only for Procetel S.A. For 2025, the Electromagnetica group (the "Group") also included Electromagnetica Fire S.R.L. and Electromagnetica Prestserv S.R.L., but they were dissolved and liquidated during 2025.

DESCRIPTION OF THE ACTIVITY AND OPERATIONAL CONTEXT

In the first half of 2026, the Group and the Company continued the process of consolidating the management and rental activity of commercial and industrial spaces, with a focus on increasing recurring revenues and optimizing the performance of the real estate portfolio.

The business model is based on generating stable income from the rental of real estate assets, the portfolio consisting of commercial and industrial spaces with a total area of approximately 65,400 sqm GLA, distributed as follows:

- 62,000 sqm in Bucharest (Calea Rahovei 266–268) - Electromagnetica Business Park;
- 3,400 sqm in Vârtelu, Magurele city, Ilfov county.

In an economic context still characterized by volatility and cost pressures, the Company continued the efficiency measures previously implemented, aiming to:

- stabilization of recurring rental income;
- increasing the employment rate;
- optimization of the contractual structure with tenants;
- strict control of operational costs.

Revenues from rental activity (rents, maintenance services and utilities rebilled) increased by 9% compared to Q2 2025, confirming the resilience of the portfolio in competitive market conditions. The seasonal differences between quarters (Q1 and Q4 compared to Q2 and Q3) are mainly generated by the thermal energy revenues invoiced to tenants in the cold season.

In H1 2026, revenues from rental activity were composed of revenues from renting spaces and parking lots (68%), revenues from maintenance tax (24%) and revenues from thermal energy tax (6%).

Consolidated revenue from rental activities H1 2026

Individual revenue from rental activities H1 2026

The revenues generated from the rental of spaces and parking spaces decreased by 1.3% compared to the first half of 2025, the decrease being mainly determined by the termination of some contracts at the end of 2025 partially offset by the conclusion of the lease agreement with the company KOMFITT Expert S.R.L. for a space of 2,995 sqm (approx. 5% of the total leasable area of GLA), as well as 50 parking spaces within the Electromagnetica Business Park location. In addition, the Company and the Group recorded an increase in revenues from the maintenance fee (service charge) of 56%.

OPERATIONAL PERFORMANCE AND EVOLUTION OF THE REAL ESTATE PORTFOLIO

As of June 30, 2026, Electromagnetica's real estate portfolio maintained an occupancy rate similar to that recorded at the end of the first quarter of 2026. The evolution was influenced by the continuous renegotiation of contracts and by the adjustment of the tenant portfolio structure.

In the second quarter of 2026, 8 new lease contracts were concluded, for a total area of 3,500 sqm. The demand was mainly for office spaces, followed by spaces for commercial, production and distribution use. At the same time, 9 contracts were renewed, covering an area of 960 sqm, contributing to maintaining the stability of rental income.

The occupancy rate is differentiated by location:

- Calea Rahovei nr. 266–268 (Bucharest): ~51% average rental rate;
- Vârteju (Vârteju county) Ilfov: ~46% average rental rate.

Both properties continue to offer opportunities to increase occupancy. In this regard, the management team carries out actions to promote the available spaces, adapts the commercial conditions to the market demand and aims to maintain the competitiveness of the portfolio.

The evolution of the portfolio reflects:

- the continuation of the process of renegotiation of existing contracts;
- targeting tenants with high creditworthiness and low risk;
- maintaining a balance between employment and income quality;
- Focus on the stability of recurring cash flows.

The structure of the portfolio, depending on the destination of the spaces, remained balanced:

- storage spaces – 27%;
- office spaces – 24%;
- spaces for the provision of services – 31%;
- spaces for production – 18%.

This structure reflects an operational diversification that helps to reduce the risk of concentration on a single business segment.

The portfolio management activity was supported by a prudent approach to maintenance investments, oriented towards maintaining the functionality of the assets and gradually improving the attractiveness of the available spaces, in parallel with the optimization of operational costs.

In terms of asset management, investments in maintenance work have been made prudently, in order to keep the buildings in good working order, increase the attractiveness of the spaces available for rent and optimize operating costs.

At the H1 2026 level, the Group and the Company managed approximately 300 contractual lease relationships. The top 10 tenants generated about 37% of rental income, and the top 20 about 51%, indicating a moderate level of revenue concentration.

FINANCIAL PERFORMANCE ANALYSIS AND STRATEGIC DIRECTIONS

In the first half of 2026, the Group and the Company recorded a mixed evolution of financial indicators, characterized by a reduction in turnover, while improving operating profitability and net income.

Indicator	Group		Society	
	H1 2025	H1 2026	H1 2025	H1 2026
Turnover (thousands of RON)	16,817	13,332	16,863	13,379
EBITDA* (RON thousands)	(1,900)	10,636	(1,576)	10,843
Net result (RON thousands)	(3,394)	10,488	(3,676)	16,372

*EBITDA represents profit before corporate income tax expense, depreciation and amortization expense, expenses and financial income.

The 21% reduction in turnover is associated with the process of repositioning the Group's activity towards a model centered on recurring rental revenues, this segment becoming the main generator of stable operating flows, with a share of approximately 99% in the total turnover (at first half of 2025, revenues from the sale of products and services of RON 4.27 million were recorded, in 2026, registering their value of RON 0.35 million in the same period, see note 11 Revenues).

The significant increase in EBITDA and net income is mainly due to:

- streamlining the operational cost structure;
- reduction and optimisation of administrative costs;
- recurrent rental income.

Personnel expenses decreased by 62%, from RON 6,812 thousand in H1 2025 to RON 2,600 thousand in H1 2026, in line with the decrease in the average number of employees, from 85 to 36.

At the same time, depreciation and depreciation expenses decreased by 73%, from RON 5,275 thousand to RON 1,437 thousand. This evolution reflects the reclassification, on December 31, 2025, of properties from the category of tangible assets to that of real estate investments, following the change of their destination from own use for rental purposes.

At the end of June 2026, the Group derecognised the assets and liabilities of Procetel S.A. (a company in the process of voluntary liquidation) at their consolidated book values, as well as the carrying amount of the non-controlling interests related to it.

The company recorded in the individual financial statements the gain from the derecognition of the investment and the recognition of the real estate assets at fair value, as well as the gain resulting from the termination of the intra-group leasing contract (respectively RON 5.4 million), which were completely eliminated upon consolidation.

Overall, the positive evolution of profitability highlights the increase in operational efficiency, in the context of the focus of the activity on the management and capitalization of the real estate portfolio.

Strategic perspectives and directions

For the next period, the Group and the Company maintain their strategic orientation towards consolidating a stable business model, based on recurring and predictable revenues.

The main directions include:

- increasing the occupancy rate of the real estate portfolio;
- optimizing the tenant mix, with a focus on reducing the risk of concentration;
- improving the contractual structure in the medium and long term;
- maximizing the yield of your existing portfolio by making efficient use of available space.

The strategic objective remains to strengthen a stable and predictable operational profile, with a focus on operational efficiency and sustainable recurring revenue growth.

MANAGEMENT OF SIGNIFICANT RISKS

The risk management policy at Group and Company level includes all the principles, procedures and control mechanisms necessary to identify, assess, monitor and manage significant risks that may influence the achievement of strategic objectives and the performance of the activity in conditions of efficiency and legal compliance.

Risk management is an essential component of corporate governance and is integrated into current decision-making processes, being adapted to the specifics of the activities carried out within the Electromagnetica Group.

The main categories of risks identified are:

- market risk;
- credit risk (non-payment);
- liquidity and cash-flow risk;
- operational risk (including legal and compliance);
- data protection and processing risk;
- the risk of sanctions;
- litigation risk;
- risks covered by insurance policies.

Market risk

Market risk is the risk of incurring losses as a result of adverse developments in market variables, such as interest rates, exchange rates, commodity prices or selling prices of goods and services.

The Group and the Company continuously monitor macroeconomic and sectoral developments, with the objective of maintaining a balance between profitability and the risk associated with the activities carried out.

Currency risk

Currency risk is the risk of losses arising from exchange rate fluctuations. The exposure of the Group and the Company is limited, as the majority of supplies and transactions are carried out in the domestic market.

In order to mitigate the impact of exchange rate variations, the Group and the Company correlate the timing of payments with that of foreign currency receipts and permanently monitor foreign currency positions. Typically, cash flows generate a surplus that helps mitigate currency risk. No derivatives are used to hedge this risk.

Risk of non-payment

Credit risk consists of the possibility that the contractual partners will not meet their obligations, generating financial losses. Trade receivables come from a diverse number of customers, mainly economic agents active in various fields.

The Group and the Company apply prudent partner selection policies and, where market practice allows, require contractual guarantees. It also continuously monitors the situation of claims and takes steps to recover them, including notifications, payment orders, court actions (payment orders) and, where appropriate, foreclosure.

The exposure to credit risk is reviewed periodically, and the adjustments for the impairment of receivables are constituted in accordance with the applicable accounting regulations.

Liquidity and cash-flow risk

Liquidity risk is the risk that the Group and the Company will not be able to meet their payment obligations at maturity.

The management of this risk is achieved by:

- developing cash flow forecasts;
- maintaining an adequate level of liquidity buffers;
- monitoring the maturities of receivables and debts;
- setting investment priorities according to available resources.

The investments were made mainly from own sources, depending on the current needs of the Electromagnetica Group and the sectors considered profitable or developing. Liquidity risk is closely correlated with market and credit risks and is monitored integrated into the risk management system.

Data protection and processing risk

The risk can be generated by situations such as accidental loss or modification of data, as well as unauthorized access to personal data. Regardless of the basis of processing, Electromagnetica Group complies with the obligations set out in the General Data Protection Regulation (GDPR) – Regulation (EU) 2016/679 including the obligation to inform the data subject, at the time of data collection.

Risk of sanctions

The Group and the Company manage this risk through preventive actions. This involves, among other things, monitoring legislative changes and informing employees, participation in courses and seminars (labor law, competition law, GDPR - personal data protection, risk management and corporate governance, etc.).

Litigation risk

The Group and the Company are involved in disputes specific to the current activity, but their values are not such as to affect financial stability. In most cases, the Group and the Company have the status of creditor.

For all pending cases, including those concerning companies in insolvency or bankruptcy, procedural positions are formulated and legal steps to protect the Group's interests are actively pursued.

Risks covered by insurance policies

In order to mitigate the impact of unforeseen events, the Group and the Company conclude appropriate insurance policies, which may cover, as the case may be: the risk of natural disasters, the risk of accidental damage, the risk of business interruption, the risk of injury to exposed employees, the protection of assets through insurance, liability to third parties, liability as a manufacturer, professional liability for some professions, the liability of the directors.

1. GENERAL INFORMATION

Electromagnetica S.A. is a joint-stock company, with Romanian legal personality, with unlimited lifespan, which is organized and operates according to the statute and based on Law no. 31/1990 as well as Law no. 24/2017 on issuers of financial instruments and market operations and Regulation no. 5/2018 on issuers of financial instruments and market operations.

The company has its registered office in Bucharest, Calea Rahovei nr. 266-268, sector 5, Bucharest, Romania, postal code 050912, telephone 021.404.21.01, 021.404.21.02, fax 021.404.21.95, website www.electromagnetica.ro, unique registration code RO 414118, registration number with the Trade Register J1991000019408.

On 30.06.2026, the company's share capital is RON 67,603,870.40, divided into 676,038,704 common shares, registered and dematerialized, registered in an electronic account in the shareholders' register kept by Depozitarul Central S.A.

The main object of activity of Electromagnetica S.A. is NACE 6820 - Rental and subletting of own or leased real estate, according to the Classification of Activities in the National Economy, approved by the Order of the President of the National Institute of Statistics no. 377/17.04.2024 (CAEN Rev.3).

The details of the Company's investments in subsidiaries as of June 30, 2026 and December 31, 2025 are as follows:

June 30, 2026

The voluntary liquidation procedure of Procetel S.A. continued during 2026, a subsidiary in which Electromagnetica S.A. it held the status of majority shareholder, the rest of the share capital being held by minority shareholders (interests that they do not control). The General Meeting of Shareholders Procetel S.A. approved the final liquidation financial statements, with the reference date 30.04.2026.

By the same decision, the plan for the distribution of the net assets resulting from the liquidation was approved, structured as follows:

- The Company, as majority shareholder, approved the distribution of the real estate assets held by Procetel S.A. (land and constructions), the difference up to the total net assets due to the Company to be distributed in cash (ron);
- To the minority shareholders, the net assets due were distributed exclusively in cash (ron), proportional to the share held by each of them in the share capital of Procetel S.A.

In the individual interim financial statements, following the final approval of the distribution plan, the Company has derecognised the investment held in Procetel S.A., measured at cost in accordance with IAS 27.10, at the same time as the recognition of the cash amount due under the distribution plan and of the immovable assets (land and construction) received, the latter being recognised at fair value determined on the basis of an independent valuation report and subsequently classified as real estate investments, in accordance with the use and purpose of their ownership by the Company.

The difference between the total fair value of the consideration received (cash and immovable assets) and the carrying amount of the unrecognised investment was recognised as a gain in the individual profit or loss account for the period, in the amount of RON 5,386,875, presented in the individual interim statement of the overall result.

In addition, prior to the liquidation, between the Company (as lessee) and Procetel S.A. (as lessor) there was a lease agreement for one of the distributed constructions, for which the Company had recognized, in accordance with IFRS 16, an asset representing the right of use and a corresponding leasing obligation; as a result of the acquisition of ownership of the respective construction by the Company, the leasing contract was terminated, and the asset related to the right of use and the leasing debt were derecognized, with the recognition in the profit or loss account of the resulting difference, in the amount of RON 80,551.

In the consolidated interim financial statements, the Group lost control over Procetel S.A. starting with the date of final approval of the distribution plan. In accordance with IFRS 10, at the date of loss of control, the Group derecognised the assets and liabilities of Procetel S.A. at their consolidated book values, as well as the carrying amount of non-controlling interests related thereto. The cash amounts distributed to the minority shareholders were treated as settlement of non-controlling interests and corresponded to their consolidated carrying amount, so that no gain or loss resulted in any gain or loss in the consolidated profit or loss account for the period. The land and buildings distributed to the Company continued to be recognised in the consolidated financial statements at their pre-existing carrying value at Group level, without revaluation at fair value at the time of distribution, as these assets remained at all times in the scope of consolidation of the Group, no transaction involving any external part of the Group.
