

Additional solar capacity of around 130 MW, part of OMV Petrom – Renovatio partnership, entered commercial operations

- ▶ Three photovoltaic parks with a total installed gross capacity of ~130 MW are now operational
- ▶ OMV Petrom holds a 50% interest in these projects, alongside Renovatio
- ▶ The investments required for the development and grid connection of the three projects amount to approximately EUR 78 million
- ▶ Renewable energy producing assets in OMV Petrom's portfolio, including partnerships, now have a cumulative capacity of ~ 200 MW

OMV Petrom, the largest integrated energy producer in South-East Europe, announces that three photovoltaic parks developed in partnership with Renovatio have become operational and are now delivering power to the national grid.

The projects have a total gross installed capacity of ~130 MW and are located in Țândărei, Bucovăț and Căzănești. The net capacity attributable to OMV Petrom's interest in the three projects is around 65 MW.

The total gross estimated annual production of the three parks of 0.2 TWh is equivalent to the annual electricity consumption of more than 110,000 households in Romania.

"The commissioning of these solar parks is another step in advancing our renewable power portfolio. Operational assets in our portfolio, including partnerships, now have a cumulative total capacity of around 200 MW. A further 1,200 MW is under construction, and we target over 2,500 MW of operational capacity by 2030. These new renewable power capacities support Romania's energy transition," said **Franck Neel, member of the Executive Board of OMV Petrom, responsible for Gas & Power.**

Total investment for the three projects amounts to approximately EUR 78 million, thereof ~EUR 26 million grants under Romania's National Recovery and Resilience Plan (PNRR).

OMV Petrom is strengthening its position in the electricity market with a portfolio that includes the 860 MW Brazi power plant, over 2,500 MW of renewable capacity projects (including partnerships) currently in various stages of implementation, and power storage projects in Romania and Bulgaria.

About OMV Petrom

OMV Petrom is the largest integrated energy producer in Southeastern Europe, with an annual Group hydrocarbon production of approximately 38 million boe in 2025. The Group has a refining capacity of 4.5 million tons annually and operates an 860 MW high-efficiency gas-fired power plant. The Group is present on the oil products retail market in Romania and neighbouring countries through approximately 780 filling stations under two brands – OMV and Petrom.

OMV Petrom is listed on the Bucharest Stock Exchange, with a 28.1% free float. As of end-2025, Romanian shareholders held around 45% of the shares (of which the Romanian state held 20.7%, and 24.4% were owned by pension funds in Romania, as well as other Romanian natural persons and legal entities). OMV

Aktiengesellschaft held a 51.2% stake in OMV Petrom, and the remaining 3.7% were held by other foreign investors.

OMV Petrom is one of the largest contributors to the state budget, with more than 48 billion euro in taxes and dividends paid between 2005 and 2025. During the same period, the company invested over 21 billion euro and allocated around 210 million euro to develop communities in Romania, focusing on environmental protection, education, health, and local development.
